

Star gazing

On the windy hillside I feel the winter's chill
My fingers numb with cold a longing in my soul
Suddenly the night the sky is filled with blinding light
And music fills the skies as I rub my weary eyes

Chorus

Star gazing, star gazing, star gazing tonight
Star gazing, star gazing, star gazing tonight
Angels bringing good news to banish all my fear
At first light of dawn a Saviour will be born
From the sin that grips us He comes to bring release
Shine light into our lives and lead us into peace

Bridge

The tender mercy of God shining in the starry skies
Bathing me in heaven's light, star gazing tonight

Chorus
